Speed
payments in near real-time

Always on
24 hours a day, seven days a week, 365 days a year

Data enriched
more remittance information with payments

Simple addressing (PayID)
use an easy-to-remember identifier

The New Payments Platform is a fast, versatile, data-rich payments system available any time of the day, any day of the year.

Opportunity for Corporates

The New Payments Platform presents a significant opportunity for Corporates across the Australian economy. The Platform's combination of faster funds availability and enriched data capability could drive considerable operational and process efficiency improvements via increased automation and straight through processing, as well as improve customer service and lower costs.

The New Payments Platform could enable:

- Ability to send richer data either with the payment message or via a link to an externally hosted document
- Faster payment of accounts payable and receivable, 24x7 with no cut off times
- Improved automation and operational efficiency (e.g. automatic reconciliation)
- Using your organisation's ABN to direct payments
- Opportunity to leverage the "Request to Pay" service enabling real time payment requests

Overlay Services

The New Payments Platform's infrastructure has the flexibility to support multiple tailored payment products and services (Overlay Services). Osko by BPAY is the Platform's first Overlay Service and enables consumers and businesses to send payments in near real-time, 24 hours a day, seven days a week. New Overlay Services will be added over time.

Possible Use Cases

P2B

- Micro-businesses
- SMEs for delivery of products/ services
- E-commerce

B2P

- Instant payment to cover insured damages
- Superannuation contributions
- Single touch payroll

B2B

- Transport with delivery of goods versus payment
- E-invoicing

Financial Institutions involved with the New Payments Platform will be developing their own range of product and service offerings for their customers.

Talk to your financial institution to find out more.
